SAVINGS & LOAN ASSOCIATIONS

GENERAL REMARKS

In compliance with the provisions of Louisiana Revised Statutes, submitted herewith is report of the condition of the fifty-eight state chartered savings and loan associations, and branches, in Louisiana, for the period ending December 31, 1983.

Total resources of the fifty-eight state chartered savings and loan associations, for this period, totaled $7,614,712,926, an increase of $1,545,872,112, since the previous year, which represents a 25.4 percent growth rate. This increase is attributed to better economic times and the conversion of Dixie Federal Savings & Loan Association to a state charter.

Outstanding mortgage loans, at the close of business December 31, 1983, amounted to $5,446,085,434. This was an increase of $760,273,207, or 16.2 percent. Loans in process were $99,391,606, as compared to the $22,058,886 at year ending December 31, 1982. This voluminous increase is attributed to a decline in interest rates, wholesale adoption of new mortgage instruments, and an active secondary market for home loans.

At the end of the period, the associations had 958,287 shareholders, who owned $6,579,274,976 of various savings accounts or certificates for a 26.9 percent growth rate. The growth is attributed to aggressively seeking new savings accounts, expanded powers and authority for the savings and loan industry, recodification of the savings and loan law, and conversions of federal associations into state associations.

Regulatory net worth of state chartered savings and loan associations increased 52.8 percent for the year. This is a significant increase over the 13.9 percent decline rate reported at the period ending December 31, 1982. As of December 31, 1983, regulatory net worth amounted to $381,487,710. Forty-two (42) of fifty-eight (58) state chartered associations were profitable for the year. The dramatic increase in net worth is a direct result of increasing powers and authority, the change in the economy, the influx of new capital funds by the conversion of mutual associations into stock associations, Dixie Federal Savings & Loan Association becoming a state chartered association, and through the majority of savings and loan associations being profitable for the year. The fifty-eight (58) state chartered associations for this period enjoyed a 4.47 percent ratio of net worth to total assets at year end which is well above the 3 percent required net worth of all federally insured savings and loan associations.

The Office of Financial Institutions devoted much time to increasing the authority and powers of state chartered savings and loan associations. Numerous rules were promulgated, in addition to this Office taking the lead in drafting and passing a complete recodification of the savings and loan law. This, in effect, has resulted in state chartered savings and loan associations being able to compete and operate on a level with federally chartered savings and loan associations.

Some significant changes have occurred in the major indicators. The increase in total resources and savings accounts, as well as the decline in interest rates are all positive factors. If these trends continue, 1984 will, also, be a profitable year for state chartered savings and loan associations.
